SINGLE ACTING PNEUMATIC ANGLE SEAT VALVE

DESCRIPTION

The Angle Seat Valve is a 2/2-way pneumatically actuated piston valve for liquids, gases, steam and some aggressive fluids (vacuum services also.) The superior design of the piston is unique to the market, enabling the plug to retract farther from the flow path, ensuring the highest flow capacity. The dual packing design and a large diameter self-aligning stem insures the highest cycle life. A full range of accessory items are available including limit switches, solenoid valves, manual override devices, stroke limiters.

FEATURES

- High Cycle-Life
- Integrated pneumatic actuator
- Fast valve actuation
- High Cv (Flow Coefficient)
- Compact assembly
- Actuator head rotates 360°
- Visual indicator
- Robust seat & stem

APPLICATION

- Food and Beverage Processing
- Water Technology & Treatment
- Textile Industry
- Cooling systems on injection molding machines
- Pharmaceutical & cosmetic industry
- Chemical Process technology
- Refrigeration & Cooling heat exchangers
- Sterilizers steam supply
- Water applications: Mining, Cement / Concrete Systems,
- Pulp & Paper
- General industrial applications of aggressive fluids
- Industrial Laundry Equipment
- Industrial Air Dryers

ADVANTAGE

- Hygenic design, easy cleaning
- High-temperature resistance
- Minimized dead leg design
- Optical position indicator
- Easy maintenance
- Good regulation properties
- Clean and smooth exterior for sterile washdowns

CONSTRUCTION

VALVE BODY	AISI 316 Stainless Steel
ACTUATOR BODY MATERIAL	AISI 304 Stainless Steel
SEAT MATERIAL	PTFE / PTFE-CF
AIR INLET/SUPPLY PRESSURE	1/4" / 3-8 bar
OPERATING TEMPERATURE	10....+220C
PRESSURE CLASS	PN 16
